Practical Procedures in Orthopaedic Trauma Surgery

Peter V. Giannoudis, Hans-Christian Pape

Practical Procedures in Orthopaedic Trauma Surgery Peter V. Giannoudis, Hans-Christian Pape

This highly illustrated textbook provides an essential guide for surgeons in training. It follows a step-by-step approach to performing a surgical procedure. It includes details of positioning the patient, the approach and reduction technique, the implant to be inserted, protocols for postoperative mobilization, complications to look for, when the patient should be seen in the outpatient clinic and whether the implant should be removed. Intraoperative pictures have been incorporated to make the surgeon aware of all the important issues involved. It covers the most common trauma procedures that surgeons in training are expected to perform during their residency. Each procedure has been written by an expert. This will be an invaluable resource for the resident in training during the long on-call nights in the hospital while preparing for the operations necessary to help trauma patients.
