## MR Spectroscopy of Pediatric Brain Disorders

Magnetic resonance spectroscopy (MRS) is a modality available on most clinical MR scanners and readily integrated with standard MR imaging (MRI). For the brain in particular, MRS has been a powerful research tool providing additional clinically relevant information for several disease families such as brain tumors, metabolic disorders, and systemic diseases. The most widely-available MRS method, proton ( $^1\text{H}$ ; hydrogen) spectroscopy, is FDA approved for general use in the US and can be ordered by clinicians for patient studies if indicated.

There are several books available that describe applications of MRS in adults. However, to the best of our knowledge there is currently no book available that focuses exclusively on applications in pediatrics. MR spectroscopy in the pediatric population is different from adults for two main reasons. Particularly in the newborn phase the brain undergoes biochemical maturation with dramatic changes of the "normal" biochemical fingerprint. Secondly, brain diseases in the pediatric population are different from adult disorders. For example, brain tumors, which are mostly gliomas in the adults, often originate from different cell types and are also more diverse even within the same type and grade of tumor. This diversity of diseases and its implications for MR spectroscopy has not been addressed sufficiently in the literature, we believe. The target audience for "MR Spectroscopy of Pediatric Brain Disorders" are thus both clinicians and researchers involved with pediatric brain disorders. This includes radiologists, neurologists, neurooncologists, neurosurgeons, and more broadly the neuroscience and neurobiology community.

This book will provide the necessary background information to understand the basics of MR spectroscopy. This will be followed by a detailed discussion of the normal biochemical maturation which will highlight the metabolic differences between the pediatric and adult brain. Thereafter, in SECTION I individual chapters will address various pediatric brain disease families. Of particular importance for pediatrics are case studies. For that reason, SECTION II will contain a large number of case studies. This will be particularly important for clinicians who may want to see examples of MRS for various conditions. A standardized format will be used for case reports that allow the reader to quickly understand the history of each case presented and the significance of the findings. The case reports will also include information from other imaging modalities to point out any added value of MRS in addition to conventional studies and clinical information. This section is necessary because the format of providing more complete information about individual patients is not practical for the chapters in SECTION I.

### From reader reviews:

#### **Leona Ferretti:**

Book is to be different per grade. Book for children right up until adult are different content. As you may know that book is very important for us. The book MR Spectroscopy of Pediatric Brain Disorders was making you to know about other know-how and of course you can take more information. It doesn't matter what advantages for you. The publication MR Spectroscopy of Pediatric Brain Disorders is not only giving you far more new information but also to get your friend when you feel bored. You can spend your own personal spend time to read your publication. Try to make relationship with all the book MR Spectroscopy of Pediatric Brain Disorders. You never feel lose out for everything should you read some books.

#### **Christine Hughes:**

Nowadays reading books become more and more than want or need but also become a life style. This reading practice give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book that improve your knowledge and information. The information you get based on what kind of guide you read, if you want have more knowledge just go with schooling books but if you want truly feel happy read one with theme for entertaining such as comic or novel. The actual MR Spectroscopy of Pediatric Brain Disorders is kind of guide which is giving the reader unpredictable experience.

#### **Gene Green:**

The e-book untitled MR Spectroscopy of Pediatric Brain Disorders is the guide that recommended to you to see. You can see the quality of the publication content that will be shown to anyone. The language that article author use to explained their ideas are easily to understand. The author was did a lot of investigation when write the book, hence the information that they share for you is absolutely accurate. You also could possibly get the e-book of MR Spectroscopy of Pediatric Brain Disorders from the publisher to make you a lot more enjoy free time.

#### **Hazel Mercado:**

Do you have something that you want such as book? The e-book lovers usually prefer to pick book like comic, quick story and the biggest one is novel. Now, why not attempting MR Spectroscopy of Pediatric Brain Disorders that give your enjoyment preference will be satisfied simply by reading this book. Reading behavior all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be claimed constantly that reading behavior only for the geeky particular person but for all of you who wants to become success person. So , for every you who want to start examining as your good habit, it is possible to pick MR Spectroscopy of Pediatric Brain Disorders become your starter.
