## **Using OS X Lion Server at Home** Terry Walsh

Using OS X Lion Server at Home is the "missing manual" for Apple's OS X Lion Server operating system. If you've ever thought about powering your digital home with an Apple Mac home server, then this book takes you step by step through selecting the right hardware, installing and configuring Apple's server operating system.

Written in straightforward language for non-geeks and those new to OS X, this comprehensive guide ensures you can get the most out of OS X Lion Server in the home by walking you through the product's essential features.

Discover file and folder sharing, setting up shared family calendars and contacts, remote access, backup, media streaming, managing and configuring iPhones and iPads via your server and more. Buy and register the book and you'll get exclusive access to new chapters, walkthroughs and guides with tips, tricks and guides to come including the use of iCloud, remote access from via VPN from desktop and mobile, and the use of OS X Lion Server Software Update Services for Mac client updates.

Chapters 1-16 (comprising 302 pages) are now available with full colour screenshots, and you'll receive notification of new chapters for download as soon as they're published.

Backing Up Your Macs to Lion Server With Time Machine

Backing Up Your PCs to Lion Server

Access Lion Server Anywhere With VPN

Create and Host Websites, Blogs and Wikis

## Reader Reviews for Using OS X Lion Server in the Home

Thanks for doing this series -- very timely for me as I am just getting ready to download Lion Server and do

a similar setup myself. I was searching to see how people used a Lion server for their home networks and to look for any guidance, so glad I found this series.

Just discovered this article series today. I've read a couple of the sections and it looks good.

I must say it hit me as like a breath of fresh air to me the moment I saw the Mac headline on WGS, a site that I associate with Windows, and Home Server. And after what happened and the lack of any positive news our of the field for a while, I have no doubt this Mac Server series is going to be very interesting.

This series is an excellent resource.

This is great so far - thanks! I am not an IT pro, but the family has all their photos, music, video etc fragmented on individual macs, all laptops, (and 1 PC). I am seriously considering buying a mini server to consolidate and share these files. I cant wait to read the upcoming segments! Thanks again.

Great article! Keep up the good work...I can't wait for the next part of the series. I'm thinking of ditching WHS and WMC all together and building a hackintosh lion server and a hackintosh plex media center.

I have to admit, this is a great article! I have a friend/client wanting to network his house and he's a ALL MAC household and cringed when I said windows server, so if this works out, I'm on it! I am in the process of installing this on my hackintosh.

Just a question, but when will the next part be coming out? I am very excited - I love the series and I am seriously considering a mac mini server. Just wanted to see how to configure it.

Great series of articles ! Thank you.

Great articles. Looking forward for the rest of it.

I am very new to home networking and have found these articles of great help.
