Thermodynamics of the Earth and Planets

Alberto Patiño Douce

Thermodynamics of the Earth and Planets Alberto Patiño Douce

This textbook provides an intuitive yet mathematically rigorous introduction to the thermodynamics and thermal physics of planetary processes. It demonstrates how the workings of planetary bodies can be understood in depth by reducing them to fundamental physics and chemistry. The book is based on two courses taught by the author for many years at the University of Georgia. It includes 'Guided Exercise' boxes; end-of-chapter problems (worked solutions provided online); and software boxes (Maple code provided online). As well as being an ideal textbook on planetary thermodynamics for advanced students in the Earth and planetary sciences, it also provides an innovative and quantitative complement to more traditional courses in geological thermodynamics, petrology, chemical oceanography and planetary science. In addition to its use as a textbook, it is also of great interest to researchers looking for a 'one stop' source of concepts and techniques that they can apply to their research problems.

From reader reviews:

Richard Sims:

Now a day people who Living in the era just where everything reachable by interact with the internet and the resources inside can be true or not demand people to be aware of each info they get. How many people to be smart in obtaining any information nowadays? Of course the solution is reading a book. Examining a book can help individuals out of this uncertainty Information especially this Thermodynamics of the Earth and Planets book because this book offers you rich info and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it you know.

Susanne Pineda:

Playing with family in the park, coming to see the water world or hanging out with close friends is thing that usually you could have done when you have spare time, then why you don't try point that really opposite from that. Just one activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Thermodynamics of the Earth and Planets, you may enjoy both. It is very good combination right, you still desire to miss it? What kind of hangout type is it? Oh can occur its mind hangout fellas. What? Still don't understand it, oh come on its identified as reading friends.

Michael Joslyn:

Are you kind of stressful person, only have 10 or maybe 15 minute in your time to upgrading your mind skill or thinking skill actually analytical thinking? Then you are having problem with the book in comparison with can satisfy your short time to read it because this all time you only find publication that need more time to be learn. Thermodynamics of the Earth and Planets can be your answer as it can be read by you who have those short spare time problems.

Martha Lockridge:

Don't be worry when you are afraid that this book will probably filled the space in your house, you can have it in e-book means, more simple and reachable. This particular Thermodynamics of the Earth and Planets can give you a lot of good friends because by you taking a look at this one book you have factor that they don't and make anyone more like an interesting person. This kind of book can be one of one step for you to get success. This publication offer you information that maybe your friend doesn't understand, by knowing more than other make you to be great people. So , why hesitate? Let me have Thermodynamics of the Earth and Planets.
