Cybercartography, Volume 5: Theory and Practice (Modern Cartography Series)

Cybercartography, Volume 5: Theory and Practice (Modern Cartography Series)

For generations, the map has been central to how societies function all over the world. Cybercartography is a new paradigm for maps and mapping in the information era. Defined as “the organization, presentation, analysis and communication of spatially referenced information on a wide variety of topics of interest to society,” cybercartography is presented in an interactive, dynamic, multisensory format with the use of multimedia and multimodal interfaces.

Cybercartography: Theory and Practice examines the major elements of cybercartography and emphasizes the importance of interaction between theory and practice in developing a paradigm which moves beyond the concept of Geographic Information Systems and Geographical Information Science. It argues for the centrality of the map as part of an integrated information, communication, and analytical package.

This volume is a result of a multidisciplinary team effort and has benefited from the input of partners from government, industry and other organizations. The international team reports on major original cybercartographic research and practice from a variety of disciplinary perspectives, including the humanities, social sciences including human factors psychology, cybernetics, English literature, cultural mediation, cartography, and geography. This new synthesis has intrinsic value for industries, the general public, and the relationships between mapping and the development of user-centered multimedia interfaces.

- * Discusses the centrality of the map and its importance in the information era
- * Provides an interdisciplinary approach with contributions from psychology, music, and language and literature
- * Describes qualitative and quantitative aspects of cybercartography and the importance of societal context in the interaction between theory and practice
- * Contains an interactive CD-Rom containing color images, links to websites, plus other important information to capture the dynamic and interactive elements of cybercartography

The printed and e-book are not different in the content material but it just different available as it. So , do you still thinking Cybercartography, Volume 5: Theory and Practice (Modern Cartography Series) is not loveable to be your top record reading book?

Andria Miguel:

Many people spending their time by playing outside along with friends, fun activity together with family or just watching TV all day long. You can have new activity to invest your whole day by looking at a book. Ugh, ya think reading a book can actually hard because you have to bring the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Touch screen phone. Like Cybercartography, Volume 5: Theory and Practice (Modern Cartography Series) which is getting the e-book version. So , why not try out this book? Let's notice.

Deborah Anderson:

As a college student exactly feel bored for you to reading. If their teacher expected them to go to the library or make summary for some e-book, they are complained. Just tiny students that has reading's heart and soul or real their hobby. They just do what the professor want, like asked to go to the library. They go to there but nothing reading really. Any students feel that studying is not important, boring in addition to can't see colorful photos on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Cybercartography, Volume 5: Theory and Practice (Modern Cartography Series) can make you feel more interested to read.

Maryann Carson:

Reading a guide make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is composed or printed or outlined from each source that filled update of news. With this modern era like at this point, many ways to get information are available for an individual. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just searching for the Cybercartography, Volume 5: Theory and Practice (Modern Cartography Series) when

you desired it?
