With their legendary nocturnal behavior, a preference for remote habitats, changing migratory patterns, and swift flight speeds, birds of prey are particularly difficult to identify and track. *Hawks and Owls of Eastern North America* depicts the subtle differences and rich diversity among these magnificent birds. Precise identification notes and more than 200 crisp, clean photographs aid in quick and accurate classifications of a variety of raptors.

The book profiles 39 species among the New World vultures, osprey, kites, eagles, hawks and allies, falcons, owls and vagrants.

A number of features make this book especially useful:

- Descriptions are concisely organized and show sexual dimorphism, seasonal and immature plumage, and distinctive markings
- Photographs show the birds in their natural environments through the seasons
- Range maps show where each species is normally found, increasing the probability of a sighting
- Comparison charts with "look-alike" birds grouped on a single page are a distinct advantage when trying to identify a quick-flying hawk.

With 16 additional new pages and over 200 photographs, this edition of *Hawks and Owls of Eastern North America* is indispensable to naturalists and birders.
