Automatic Design of Decision-Tree Induction Algorithms (SpringerBriefs in Computer Science)

Rodrigo C. Barros, André C. P. L. F. de Carvalho, Alex A. Freitas

Presents a detailed study of the major design components that constitute a top-down decision-tree induction algorithm, including aspects such as split criteria, stopping criteria, pruning and the approaches for dealing with missing values. Whereas the strategy still employed nowadays is to use a 'generic' decision-tree induction algorithm regardless of the data, the authors argue on the benefits that a bias-fitting strategy could bring to decision-tree induction, in which the ultimate goal is the automatic generation of a decision-tree induction algorithm tailored to the application domain of interest. For such, they discuss how one can effectively discover the most suitable set of components of decision-tree induction algorithms to deal with a wide variety of applications through the paradigm of evolutionary computation, following the emergence of a novel field called hyper-heuristics.

"*Automatic Design of Decision-Tree Induction Algorithms*" would be highly useful for machine learning and evolutionary computation students and researchers alike.

From reader reviews:

Doris Williams:

Book is to be different per grade. Book for children until adult are different content. As it is known to us that book is very important for people. The book Automatic Design of Decision-Tree Induction Algorithms (SpringerBriefs in Computer Science) had been making you to know about other knowledge and of course you can take more information. It is extremely advantages for you. The reserve Automatic Design of Decision-Tree Induction Algorithms (SpringerBriefs in Computer Science) is not only giving you considerably more new information but also to be your friend when you really feel bored. You can spend your own personal spend time to read your publication. Try to make relationship using the book Automatic Design of Decision-Tree Induction Algorithms (SpringerBriefs in Computer Science). You never experience lose out for everything should you read some books.

Christine Kaufman:

In this 21st one hundred year, people become competitive in each way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated it for a while is reading. That's why, by reading a book your ability to survive increase then having chance to endure than other is high. To suit your needs who want to start reading the book, we give you this particular Automatic Design of Decision-Tree Induction Algorithms (SpringerBriefs in Computer Science) book as basic and daily reading guide. Why, because this book is usually more than just a book.

Robert Henderson:

Reading a e-book can be one of a lot of task that everyone in the world likes. Do you like reading book so. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new data. When you read a book you will get new information due to the fact book is one of a number of ways to share the information or even their idea. Second, reading through a book will make a person more imaginative. When you reading a book especially fiction book the author will bring that you imagine the story how the characters do it anything. Third, it is possible to share your knowledge to some others. When you read this Automatic Design of Decision-Tree Induction Algorithms (SpringerBriefs in Computer Science), you may tells your family, friends in addition to soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a reserve.

Sean Bass:

Precisely why? Because this Automatic Design of Decision-Tree Induction Algorithms (SpringerBriefs in Computer Science) is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will jolt you with the secret the item inside. Reading this book close to it was fantastic author who all write

the book in such amazing way makes the content interior easier to understand, entertaining method but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of positive aspects than the other book include such as help improving your skill and your critical thinking technique. So , still want to postpone having that book? If I have been you I will go to the book store hurriedly.
