U.S. Government, National Aeronautics and Space Administration (NASA), World Spaceflight News (WSN)

Professionally converted for accurate flowing-text e-book format reproduction, this phenomenal collection of over 150 fascinating documents provides unique political and engineering insights into the pathfinding days of American manned spaceflight, with coverage of the Mercury, Gemini, and Apollo programs.

One of the most important developments of the twentieth century has been the movement of humanity into space with machines and people. The underpinnings of that movement—why it took the shape it did; which individuals and organizations were involved; what factors drove a particular choice of scientific objectives and technologies to be used; and the political, economic, managerial, and international contexts in which the events of the Space Age unfolded—are all important ingredients of this epoch transition from an Earthbound to a spacefaring people. This desire to understand the development of spaceflight in the United States sparked this documentary history series.

The extension of human activity into outer space has been accompanied by a high degree of self-awareness of its historical significance. Few large-scale activities have been as extensively chronicled so closely to the time they actually occurred. Many of those who were directly involved were quite conscious that they were making history, and they kept full records of their activities. Because most of the activity in outer space was carried out under government sponsorship, it was accompanied by the documentary record required of public institutions, and there has been a spate of official and privately written histories of most major aspects of space achievement to date. When top leaders considered what course of action to pursue in space, their deliberations and decisions often were carefully put on the record. There is, accordingly, no lack of material for those who aspire to understand the origins and evolution of U.S. space policies and programs.

This reality forms the rationale for this series. Precisely because there is so much historical material available on space matters, the National Aeronautics and Space Administration (NASA) decided in 1988 that it would be extremely useful to have easily available to scholars and the interested public a selective collection of many of the seminal documents related to the evolution of the U.S. civilian space program. While recognizing that much space activity has taken place under the sponsorship of the Department of Defense and other national security organizations, the U.S. private sector, and in other countries around the world, NASA felt that there would be lasting value in a collection of documentary material primarily focused on the evolution of the U.S. government's civilian space program, most of which has been carried out since 1958 under the Agency's auspices. As a result, the NASA History Division contracted with the Space Policy Institute of George Washington University's Elliott School of International Affairs to prepare such a collection.

From reader reviews:

Charles Eiland:

Hey guys, do you really want to find a new book to study? Maybe the book with the headline Exploring the Unknown: Selected Documents in the History of the U.S. Civil Space Program - Volume VII: Human Spaceflight: Projects Mercury, Gemini, and Apollo - Political and Engineering Insights suitable to you? The actual book was written by a popular writer in this era. Often the book is titled Exploring the Unknown: Selected Documents in the History of the U.S. Civil Space Program - Volume VII: Human Spaceflight: Projects Mercury, Gemini, and Apollo - Political and Engineering Insights. It is the main one of several books that everyone reads now. This specific book was inspired by many men and women in the world. When you read this book, you will enter a new shape that you never knew just before. The author explained their idea in a simple way, therefore all people can easily comprehend the core of this e-book. This book will give you a lot of information about this world now. So that you can see the representation of the world on this book.

Beatrice Pearson:

Playing with family in a park, coming to see the marine world or hanging out with close friends is a thing that usually you might have done when you have spare time, subsequently why you don't try something that is really opposite from that. One particular activity that makes you not experience tired but still relaxing, thrilling like on a roller coaster you already been ride on and with addition of information. Even you love Exploring the Unknown: Selected Documents in the History of the U.S. Civil Space Program - Volume VII: Human Spaceflight: Projects Mercury, Gemini, and Apollo - Political and Engineering Insights, it is possible to enjoy both. It is a great combination right, you still need to miss it? What kind of hangout type is it? Oh come on its mind hangout men. What? Still don't obtain it, oh come on its called reading friends.

Kristen Self:

This Exploring the Unknown: Selected Documents in the History of the U.S. Civil Space Program - Volume VII: Human Spaceflight: Projects Mercury, Gemini, and Apollo - Political and Engineering Insights is a new way for you who has attention to look for some information because it relieves your hunger associated with. Getting deeper you onto it getting knowledge more you know otherwise you who still having small amount of digest in reading this Exploring the Unknown: Selected Documents in the History of the U.S. Civil Space Program - Volume VII: Human Spaceflight: Projects Mercury, Gemini, and Apollo - Political and Engineering Insights can be the light food for you personally because the information inside this kind of book is easy to get by anyone. These books create itself in the form which is reachable by anyone, sure I mean in the e-book type. People who think that in reserve form make them feel drowsy even dizzy this guide is the answer. So there is no in reading a e-book especially this one. You can find actually looking for. It should be here for anyone. So, don't miss that! Just read this e-book variety for your better life and also knowledge.

Daniel Love:

Don't be worry when you are afraid that this book will certainly filled the space in your house, you may have it in e-book means, more simple and reachable. This kind of Exploring the Unknown: Selected Documents in the History of the U.S. Civil Space Program - Volume VII: Human Spaceflight: Projects Mercury, Gemini, and Apollo - Political and Engineering Insights can give you a lot of friends because by you looking at this one book you have point that they don't and make a person more like an interesting person. This kind of book can be one of one step for you to get success. This publication offer you information that possibly your friend doesn't realize, by knowing more than various other make you to be great men and women. So , why hesitate? Let me have Exploring the Unknown: Selected Documents in the History of the U.S. Civil Space Program - Volume VII: Human Spaceflight: Projects Mercury, Gemini, and Apollo - Political and Engineering Insights.
